# SKYWARN Weather Spotter Training

**Date: November 28, 2011    Time: 6:00 pm to 8:30 pm**

**Location: Poulsbo Fire Department Station 71  
911 Liberty Rd, Poulsbo , Wa 98370**

The National Weather Service and Kitsap County are offering spotter training for those interested in providing “ground truth” for emergency officials and the National Weather Service during periods of significant Northwest weather. These reports, when integrated with all other available weather information sources, help forecasters detect and warn about hazardous weather. These reports can also be used by media and Emergency Managers to encourage people to take proper action to keep their families, pets, and friends out of harms way.

New and Veteran spotters, Fire and Law officials, Citizen Corps, Amateur Radio operators and Search and Rescue personnel are encouraged to attend

**Directions:** From Route 3 North or South  
Exit Route 305 to Poulsbo/Bainbridge Island. Station 71 is located across from Poulsbo Village. From Bainbridge Island Ferry, upon leaving the Ferry continue on Route 305 to Poulsbo. Station 71 will be on your right side across from Poulsbo Village (Albertson's)
